Garden and pathway luminaires · Downward-directed light

Crafted from solid natural travertine marble, equipped with energy-efficient, adjustable-color-temperature LED lighting, these pieces strike the perfect balance between rustic charm and contemporary minimalism.

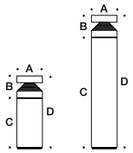

Luminaires for the illumination of pathways, squares and entrance areas.

For this product, we offer two sizes for the lamp, overall height of 54cm and 100cm. The 20W LED bollard can be controlled by on/off switching or through DALI.

Besides, this model has the idea of combining the step patterns with a concentrated light source, refine the light emission range to enhance concentration.

Distribute illumination evenly in a 360° pattern from the mounting location.

Silent glow

Bollard luminaires

Featuring a compact cylindrical design, this outdoor bollard light is available in three heights: 300mm, 500mm, and 700mm, with a consistent Ø135mm diameter. Crafted from natural marble or travertine, its solid stone construction brings an understated combination of natural texture and refined luxury to outdoor spaces.

With an 11.5W light source, the fixture provides a soft, comfortable glow for courtyards, gardens, pathways, terraces, and outdoor road lighting. The compact diameter makes it easy to integrate into different landscape layouts, while the three height options allow flexible selection according to the required lighting level and installation environment.

Bollard luminaires

Featuring a square, natural-stone design, this outdoor bollard light is available in three heights: 300mm, 500mm, and 700mm, with a compact 135mm profile and 11.5W power. Made from natural marble or travertine, the precisely shaped stone body highlights the material's natural grain and texture, creating a refined yet understated outdoor lighting element.

Designed for courtyards, gardens, pathways, driveways, and outdoor road lighting, the square form resembles a naturally placed stone within the landscape, allowing the fixture to blend seamlessly with grass, plants, paving, and architectural surroundings. The three height options provide flexibility for different lighting levels and landscape layouts, combining natural character with a premium, minimalist appearance.

Tree Spotlight · Direct Upward Illumination

Designed for garden and landscape tree lighting, this compact spotlight features a naturally shaped body crafted from marble or travertine, with CNC machining used to achieve precise stone forming and a clean architectural finish. The upward-facing light source provides direct illumination, highlighting trees, plants, textured walls, and key landscape features while adding depth to the outdoor environment.

Available in GU10 and integrated LED versions, it offers flexibility for different project specifications and maintenance preferences. The natural stone construction allows the fixture to blend into garden settings with a refined, understated appearance, making it suitable for residential gardens, hotel landscapes, courtyards, pathways, and outdoor architectural projects.

Tree Spotlight · Angled Accent Lighting

Designed for garden and landscape tree lighting, this spotlight uses an angled beam to illuminate trees, walls, architectural surfaces, and selected landscape features, creating a focused accent effect that visually highlights the target object. The housing is crafted from natural marble or travertine, with CNC machining used to achieve a precise shape while preserving the distinctive texture of the stone.

Available in GU10 and integrated LED versions, the fixture offers flexibility for different project specifications and maintenance requirements. Its compact stone body blends naturally into outdoor surroundings, making it suitable for gardens, courtyards, hotel landscapes, pathways, and architectural outdoor projects.

Wall luminaires • Light emission on two sides

This square wall lamp is the perfect lighting solution for spacious environments. Its elegant curved design, paired with a warm yellow travertine texture and a unique dual-top-and-bottom lighting structure.

Choose from two versatile sizes to suit your needs: 29cm and 39cm in length. Each size is paired with perfectly matched lighting—2×10W and 2×20W.

These luminaires can be controlled via on/off switching or DALI, delivering adjustable color temperature and high-output luminous flux (up to 150lm/W) to illuminate vertical façades with a 30-meter coverage height, ideal for super-tall architectural applications.

Wall luminaires · Up & Down surface washer

Luminaires with a shielded light source and dual-sided illumination.

These fixtures are designed so that the mounting surface also acts as a reflective surface, directing light both upward and downward. The combination of direct and reflected light produces a glare-free lighting environment with exceptional visual comfort. Suitable for a wide range of applications in residential and public spaces.

We provide these luminaires with integrated LED modules, including the specified LED lamps indicated in the accompanying table.

Wall luminaires · Classic ambient light

These wall luminaires for the illumination of walls and facades, in two sizes and with light emission on 360°, luminaires with a high protection class for outdoor use. Whether arranged individually, in rows or in groups, these are illuminating design elements that make interesting lighting concepts possible.

The luminaires can be used independent of the any position.

Crafted from marble in a wide selection of effect and colors, like travertine, these fixtures elevate the space with an air of natural elegance and sophistication.

Wall luminaires · Soft Downward

Crafted from natural marble and travertine, this wall light combines the unique texture of stone with CNC precision machining for clean, consistent edges and a refined architectural finish. Its compact geometric form directs light downward, creating a warm, controlled wall-washing effect while providing practical illumination. Ideal for corridors, stairways, entrances, residential interiors, hotel projects, and exterior façades, it integrates well with concrete, stone, and textured wall surfaces. Stone color, dimensions, finish, light source, and electrical specifications can be customized according to project requirements. For outdoor applications, the required IP rating and sealing specification should be confirmed based on installation conditions.

Wall luminaires · Soft Diffused Glow

Featuring a natural travertine or marble frame paired with durable tempered glass, this wall light combines the organic texture of stone with a clean, architectural form. The light passes gently through the glass, creating a soft, diffused glow and broad ambient illumination that enhances surrounding wall surfaces without creating harsh visual contrast.

Designed for both indoor and outdoor applications, the fixture is suitable for residential façades, entrances, corridors, patios, gardens, hotels, and commercial spaces. The glass can be customized in frosted, fluted, or clear finishes, allowing different levels of transparency and light diffusion to match various design concepts.

Wall luminaires · Soft Diffused Glow

Available in two practical shapes—square and rectangular, this series combines a natural travertine or marble frame with durable tempered glass for a refined architectural appearance. The stone frame adds natural texture, while the glass diffuser produces a soft, broad glow that gently spreads across the surrounding wall.

Designed for both indoor and outdoor use, it is suitable for entrances, corridors, façades, patios, gardens, hotels, restaurants, and residential projects. The tempered glass is available in frosted, fluted, or clear finishes, allowing different levels of transparency and light diffusion to meet varied design requirements.

Step luminaires · Downward Glow

Featuring a round architectural design, this outdoor step light is available in both surface-mounted and recessed versions, providing flexible installation options for different project requirements. The housing is crafted from natural marble or travertine, allowing each fixture to retain the unique texture and color variation of the stone while blending naturally into surrounding walls and architectural materials.

Available in two sizes with 4W and 6W options, the fixture directs light downward to provide soft, practical illumination along stairs, corridors, pathways, and exterior walls. Its compact form and natural stone finish make it particularly suitable for landscape and architectural projects where the lighting needs to integrate with the environment rather than dominate it.

Step luminaires · Downward Glow

Featuring a square architectural design, this outdoor step light is available in both surface-mounted and recessed versions, offering flexible installation for different wall structures and project requirements. The housing is crafted from natural marble or travertine, with the stone's natural texture helping the fixture blend seamlessly into surrounding walls, stonework, and landscape environments.

Available in two sizes with 4W and 6W options, the fixture emits light downward through the integrated opening, providing soft and practical illumination for stairs, corridors, pathways, entrances, and exterior walls. Its low-profile design makes it well suited to architectural and landscape projects where functional lighting needs to remain visually integrated with the environment.

Step luminaires · Downward Glow

Featuring a rectangular design, this outdoor step light is available in both surface-mounted and recessed versions, providing flexible installation options for different architectural structures. The housing is crafted from natural marble or travertine, preserving the stone's distinctive texture and allowing the fixture to integrate naturally with walls, paving, and landscape elements.

Available in 8W, the fixture directs light downward to provide practical pathway illumination for stairs, corridors, walkways, garden beds, planters, and outdoor walls. The 24V low-voltage design offers a safer solution for outdoor landscape applications, while the compact rectangular profile keeps the lighting visually integrated with the surrounding environment.

Step luminaires · Recessed

Featuring a square recessed design, this series offers three distinctive light patterns: slim linear, oval, and trapezoidal beams, allowing different visual effects to be selected according to the architectural setting. The housing is crafted from natural marble or travertine, with a 2W light source providing subtle illumination while preserving the natural character of the stone.

Designed for outdoor applications, the fixture is suitable for stairs, corridors, pathways, garden beds, and landscape areas, blending naturally with surrounding stone and architectural finishes. The recessed installation creates a clean, integrated appearance, and each fixture is supplied with a dedicated electrical installation box for easier project installation.

Wall luminaires · Dual-Sided light

Available in three sizes, this series allows flexible selection according to wall dimensions and interior space. The combination of natural travertine or marble with a bronze-finished aluminum body creates a balanced contrast between organic stone texture and refined metalwork, adding a distinctive decorative element to interior walls.

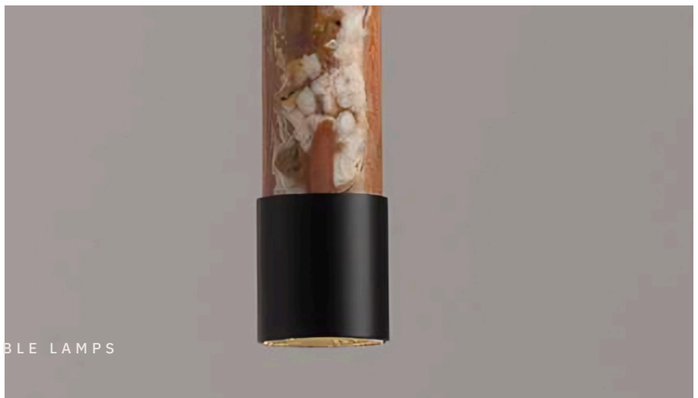

Equipped with a G9 lamp holder, the light source can be easily replaced to simplify maintenance and allow different bulb options. Light is emitted both upward and downward, producing a soft architectural glow suitable for bedrooms, living rooms, hallways, hotels, restaurants, and other interior decorative lighting applications.

Chandeliers

This exquisite chandelier redefines modern lighting through its masterful blend of natural marble and sleek metal. Available in three standard sizes or fully customizable dimensions, it showcases the organic beauty of marble's unique veining against the precision of metallic finishes. The design harmonizes warm stone textures with cool metal tones, creating a striking yet balanced aesthetic. Its minimalist lines accentuate the material contrast, offering both sophisticated elegance and inviting warmth—perfect for elevating any space with timeless artistry.

Pendant

Combining natural marble or travertine with refined metalwork, this pendant series creates a distinctive contrast between organic stone texture and contemporary metal detailing. Two designs are available: one features a perforated metal shade for a soft, diffused glow, while the other uses a solid metal structure with COB downward lighting for a more focused beam. The COB version also incorporates an integrated LED light strip, with a total power of 6.5W.

Designed for dining areas, bedside lighting, kitchen counters, hospitality spaces, and residential interiors, the pendant format allows flexible single or grouped installation. The combination of stone and metal provides a decorative lighting solution that works well across modern, contemporary, and natural-material interior schemes.

Pendant

Combining natural marble or travertine with a refined metal structure, this pendant light creates a balanced contrast between the organic texture of stone and the clean finish of metal. The cylindrical stone shade adds a warm, architectural character while the metal details provide a contemporary accent, making the fixture suitable for both decorative and functional interior lighting.

With a 6.5W COB, it is well suited for dining tables, bedside areas, kitchen counters, cafés, hotels, and residential interiors. Its compact pendant design works effectively as a single fixture or in grouped arrangements, offering flexibility for different interior layouts and project applications.
